RESEARCH POLICY

Academic institutions are obligated to participate in three activities: teaching, research, and extension. Research is one of the pioneering academic activities that help the institution attain excellence in the sphere of education. It also covers the standards of education and knowledge growth. Research and development activities provide fresh knowledge channels and stimulate innovation, which will improve learning and teaching among the faculty and students at SDHR Degree and PG College.

Research is the cornerstone of knowledge; it creates cutting-edge facilities, encourages research publications, fosters collaborations, and becomes a part of a vibrant community that supports the mission's aspirations. These factors were taken into account as SDHR Degree and PG Course formulated and implemented its research policy.

Purpose

The aim of the research policy is to instil a culture of research among faculty members and research aptitude in students. The policy is intended to operate as an overall framework for executing research operations. Furthermore, it strives to establish research thrust areas that are socially conscious and thereby serve the college's vision and mission. Contributions to society and the country as a whole are also emphasized in the research policy.

Scope

This research policy outlines the institution's research ethics principles, which are followed by all departments and serve as the direction for the operations of the research council of the institution.

Custodian of the Policy

A Research Advisory Cell, working under the principal of SDHR Degree and PG College, should be a part of the Research Policy and shall provide assistance and guidance on subjects pertaining to research conducted by the institution.

Objectives of Research Policy

The primary objectives of the research policy are as follows:

To raise the necessary research awareness among the institution's faculty.

To create a proper research culture through numerous research projects and programs.

To develop research centres in several fields with a focus on issues having social significance.

To inspire academic staff members to write research papers and take on numerous important research initiatives for society and academia,

To produce a research journal, to offer faculty members, researchers, and academicians from the college and from academia across the nation a platform.

Raising public awareness through various research activities and properly promoting potential socially beneficial research projects

Research Policy

The college must have a clearly defined research standard that serves as a directive for students, instructors, and all other personnel who may be affected.

- ⊙ To encourage high-quality, innovative basic and applied research in science, literature, business, and all other relevant and related fields.
- ⊙ To recognize and encourage faculty members to conduct research in emerging research fields.
- ⊙ To build relationships with businesses and industry groups in order to identify relevant research, surveys, and other basic research questions
- ⊙ To obtain projects, market analyses, and other research initiatives in order to get support from other commercial organizations, sectors, NGOs, boards, and forums.

- ⊙ To find academicians who can serve as research leaders and to motivate them to do research initiatives, studies, and surveys.
- ⊙ To provide financial assistance for the publication of research papers and findings.
- ⊙ To provide the teachers, researchers, and students of SDHR Degree and OG College with a proper forum for publishing their research findings and to encourage them to bring important current topics to the attention of society.
- ⊙ To organize a number of seminars in order to generate relevant research among faculty members and students.
- ⊙ To send faculty members on deputation to workshops, symposia, seminars, and conferences in their specialized disciplines and on current topics.
- ⊙ Establishing the necessary infrastructure in the college to support various research projects.
- ⊙ To improve data and information sources for conducting high-quality research projects and inquiries.
- ⊙ To carry out all additional initiatives that will foster a research culture in the institution.
